WORK EXPERIENCE

AI Automation Engineer | Self Employed

Jan 2026 – June 2026

- Built business automation systems integrating n8n, LLM APIs, databases, CRM platforms, messaging services, and third party APIs.
- Developed workflows for lead capture, qualification, appointment booking, customer communication, and support, using tools including OpenAI, Vapi, Notion, Calendly, Supabase, HubSpot, and Airtable.
- Implemented multi step workflows using REST APIs, webhooks, conditional logic, data transformation, scheduling, database operations, and automated notifications.

Web Developer | Self Employed

Dec 2023 – December 2025

- Designed and developed 10+ WordPress websites using WordPress and Elementor for business and service based clients.
- Built and configured Shopify e commerce stores, including products, payments, third party apps, theme customization, and store configuration.
- Handled SEO, indexing, performance optimization, deployment, maintenance, responsive layouts, and client requirements.

SELECTED PROJECTS

WhatsApp Outreach Automation System — n8n · ManyChat · OpenAI · Supabase

- Built a centralized workflow coordinating 14 WhatsApp accounts, including recipient management, scheduling, dynamic message generation, and response routing.
- Used OpenAI for message generation and Supabase as the central data layer, supporting several hundred outbound contacts per day.

Voice Reception & Lead Management System — Vapi · n8n · Notion · Calendly

- Built a voice based reception system handling business enquiries, FAQs, lead capture, and appointment scheduling through Vapi and n8n.
- Connected Notion for business information and lead data with Calendly for appointment scheduling, including fallback handling for enquiries requiring human follow up.

Conversational AI Platform — Django · REST APIs · AI APIs

- Developed the backend for a conversational AI platform with authentication, session management, REST APIs, and AI service integration.
- Implemented real time response streaming, persistent conversation memory, and live web search.

RAG Knowledge & Qualification System — RAG · n8n · OpenRouter · Google Calendar

- Built a knowledge based AI assistant using retrieval augmented generation for business information and user queries.
- Integrated workflow automation for lead qualification and discovery call scheduling.

TECHNICAL SKILLS

Automation: n8n, REST APIs, Webhooks, OAuth, Workflow Orchestration

AI & LLM: OpenAI, OpenRouter, RAG, AI Agents, Prompt Engineering, Vapi

Backend: Python, Django, REST APIs, Authentication, Session Management

CRM & Data: HubSpot, Airtable, Supabase, MongoDB, Notion, Google Sheets

Integrations: Calendly, Google Calendar, ManyChat, Slack, WhatsApp, Google Workspace

Web Development WordPress, Elementor, Shopify, HTML, CSS, JavaScript

EDUCATION

Intermediate (HSSC), Computer Science — FBISE, Pakistan (Expected 2027)

CERTIFICATION

Google AI Essentials — Google, 2025
